

"Piano Helper" is a tool designed to be used for teaching and learning the music notes for piano / keyboard in schools and private. It helps new beginners to learn the notes easier and faster, where the notes are located in the note system, the relationship between keys and notes and which key they should play when there is an accidental sharp or flat before a note. Note location, key names, numbers, F and G clefs are located on one notation system only. "Piano Helper" has got positive response from music schools and private individuals in Norway and other countries.
